IMPACT REPORT

Improving the health
of rural communities

A Message from our CEO

An impact report is a way for our organization to communicate how we are trying to improve rural communities, as well as our progress. AVV Health Centers strives to measure our impact on the communities we service and our patient's lives, focusing on their physical and mental health.

AVV Health Centers, INC History

AVV Health Centers was established in 2005 as a 501 c3 non-profit organization and became a federally qualified health center (FQHC) in 2009. We have grown to four locations and a mobile health care unit. AVV Health Centers serve Porter, Muskogee, Coweta and the surrounding areas. We currently have 9 medical providers and 2 licensed professional counselors.

\$8,511,076

MISSION

AVV Health Centers promotes healthier Lifestyles by Providing Quality, Compassionate, Affordable healthcare and health education services to all:

Vision

To provide accessible, quality, affordable, dependable health, dental, optical, mental health and pharmaceutical services to our community in a state-of-the-art facility with on-site urgent care and transportation.

2024 PROJECTS

DETAILS

OUTCOME

New Coweta Facility

New Facility opened January 2025

- Increase capacity - 5 to 10 patient rooms and counseling space
- Increased lab capacity

Patient Surveys

Enhanced patient surveys available at all sites

- Allows management to address patient concerns

2024 SUCCESS

Behavioral Health Billing

AVV Health Centers began billing for Behavioral Health Services in 2024. There was 1,377 billable encounters in 2024.

New Coweta Clinic

AVV Health Centers constructed the New Coweta Clinic during 2024 and the doors were officially opened in January 2025. This clinic will serve the surrounding communities with at least two providers and one behavioral health counselor.

Blood Pressure Monitor Program

In 2024, we launched the Blood Pressure Monitor Loaner Program to empower patients with the tools they need to manage hypertension at home. Recognizing that consistent monitoring is key to controlling high blood pressure—and that cost and access can be barriers—we provided free loaner devices to individuals without home monitors. This initiative supported early detection, improved chronic condition management, and strengthened provider-patient collaboration. By bridging the gap between clinical visits and home care, this program is a vital step in our commitment to equitable, preventive health services.
